

Department of Education Integrated Proposal System

Enhancing Digital Education Through Smart Technology Solutions

Project Overview

This proposal presents a centralized digital system designed to modernize school operations, improve student monitoring, and enhance communication between administrators, teachers, students, and parents.

The system integrates:

- Attendance Monitoring
- Online Class Meetings
- AI-Powered Learning Management System

System Modules Overview

Attendance Monitoring System

Real-time student attendance tracking with reporting and alerts.

Online Class Meeting

Virtual classroom platform for live and recorded lessons.

AI-Powered LMS

Tracks grades, analyzes performance trends, and detects at-risk students.

DepEd ONE

Powered by Lumen

One secure gateway for every school role.

Access enrollment, classroom operations, learner support, and national reporting through a role-scoped sign-in experience.

Identity

OIDC SSO with LRN-centered student identity

Security

MFA and step-up authentication for sensitive actions

Access

RBAC + hierarchy scope: National to School

Reliability

Low-bandwidth optimized and offline-capable modules

English | Filipino

● Network: Stable

Insights Overview

Security Context

MFA and audit trails apply to record and section changes.

Operational Status

Notifications, sync, and policy status remain visible in every workspace.

Context: School Admin / Registrar • Classroom Operations • Scope: School-Level Records

MFA and audit trails apply to record and section changes.

Attendance Monitoring System

Track attendance quality across sections, detect chronic absence trends early, and trigger policy-aligned intervention workflows.

Scope: School 0472

Week of Feb 17-21, 2026

Sync healthy

95.8%

School attendance completion this week

18

Learners with 3+ absences (30-day window)

7

Sections with late-marking spikes

2

Unsynced attendance batches pending

Daily Attendance Pulse

Section Monitoring Queue

SECTION	PRESENT %	CHRONIC ABSENCE	LATE TREND	LAST SYNC	PRIORITY
Grade 8 - Mabini	91%	6 learners	Up +3 this week	10:41 AM	Monitor
Grade 8 - Luna	98%	1 learner	Stable	10:43 AM	On Track
Grade 8 - Bonifacio	84%	9 learners	Up +5 this week	10:39 AM	Escalate
Grade 9 - Rizal	93%	4 learners	Up +1 this week	10:40 AM	Intervene

Real-time Alerts

Grade 8 - Bonifacio crossed absence threshold

3 learners moved from moderate to high-risk within 48 hours. Counselor notification required.

Offline conflict detected

Section "8-Mabini" has 1 record mismatch between teacher tablet and server snapshot.

Parent acknowledgment received

4/5 flagged absence notices were acknowledged in Parent Dashboard.

Automated Rules

3 consecutive absences Open EWS case draft

5 late marks/week Send adviser reminder

Unsubmitted by 10:30 AM

Escalate to school admin

Intervention Actions

Export Risk List

Notify Advisers

Open Conflict Resolver

Create Intervention Batch

Tracks daily student attendance in real-time and automatically flags chronic absences so schools can intervene early.

A virtual classroom optimized for low-bandwidth connections, featuring live participation tracking and integrated quick quizzes.

Context: Parent / Guardian • Enrollment • Scope: Linked Learners Only

Guardian-student linkage and consent policies are active.

LRN Validation and Dedupe Check

Validation completed in 1.9s

Check learner identity against canonical student records before final enrollment submission.

Submitted Profile

LRN: 123456789012

Name: Juan Santos Dela Cruz

DOB: 2012-08-11

Applying Grade: Grade 8

Validation Outcome

Exact LRN match found in student master record. Last enrolled school: School 0472.

Possible duplicate profile found with similar name and DOB under LRN ending in 9011. Registrar review recommended.

One attachment has unreadable scan quality. Applicant may be returned for correction if unresolved.

Remediation Guidance

Select one path to continue with clear audit trail.

Path A: Use exact LRN record and continue to registrar verification queue.

Path B: Flag potential duplicate and require school-side identity validation.

Path C: Return to applicant for corrections before queue submission.

Return for Correction

Flag as Possible Duplicate

Confirm Match and Continue

Instantly cross-references applicant data against national master records to ensure identity accuracy before applications are submitted.

AI Tutor Session

Ask for hints or step-by-step explanations grounded only in approved DepEd content.

Hint ModeStep-by-StepEnglish / Filipino

You • 10:22 AM

How do I solve $3x + 5 = 20$? Please give me a hint first.

Tutor • 10:22 AM

Start by isolating $3x$. What number should you subtract from both sides first?

You • 10:23 AM

Subtract 5 from both sides?

Tutor • 10:23 AM

Correct. Now you have $3x = 15$. What is x when you divide both sides by 3?

Type question or use voice input...
